Sanyo CO2 Heat Pump Training now available

Our impressive training facility at Bristol has been named as a 'Sanyo Approved Training Site' but we will also be holding training days at the Sanyo offices in Whyteleafe, Surrey.

Both sites have a working CO2 System in operation for your viewing.

Dates are as follows:

Thursday 12th March - Sanyo Offices
Thursday 26th March - Bristol
Thursday 16th April - Sanyo Offices
Thursday 23rd April - Bristol

Course fee - £250 + vat per person

On completion of the course the attendee will receive certification becoming an accredited installer of the Sanyo CO2 system.

Complete training module and certification upon completion of the course.

Contact **Kate Cowlard** on 08456 590022 or kate@oceanairdist.co.uk for a booking form.

Welcome to the first newsletter of the new year; a year which promises to be an exciting one despite the doom and gloom surrounding us! At Oceanair we have exciting projects underway for the new year and are increasingly encouraged by the vast amount of interest in the new Sanyo CO2 heat pump with training dates soon to be announced!

First results show Sanyo CO2 heat pump delivers exceptional efficiency in UK conditions!

Previous testing of the Sanyo CO2 heat pump has been in Scandinavia and Japan; both characterised by very low temperatures. A site was therefore chosen in Exmoor to test the unit's efficiency in the milder conditions of the UK and have confirmed excellent performance and efficiency.

The outdoor unit was installed in a controlled workshop to allow 'outside' air temperatures to be controlled between +20 deg C and -2 deg C. Results showed COP of 3.7 with water at 35 deg C and outside temp of 15 deg C. COP of 2.71 was recorded with a flow temp of 65 deg C and an outside temp of 7 deg C.
