

## Guide to Heating Products

### HFC Elite Heating System

The SANYO A2W Split System offers total comfort with ability to heat and cool easily and efficiently.

#### Features

- Warm & Cool water utilisation
- HYDRONIC Split System can be used for heating and cooling applications. Using under floor heating, radiators and fan coil units.
- *Applications:*
  - 1 zone floor or fan coil, 2 zone floor/fan/mixed
  - Domestic hot water supply
  - Boiler function
- Optimised control system—using room, ambient and water temperature sensors.

### CO2 ECO Heating System

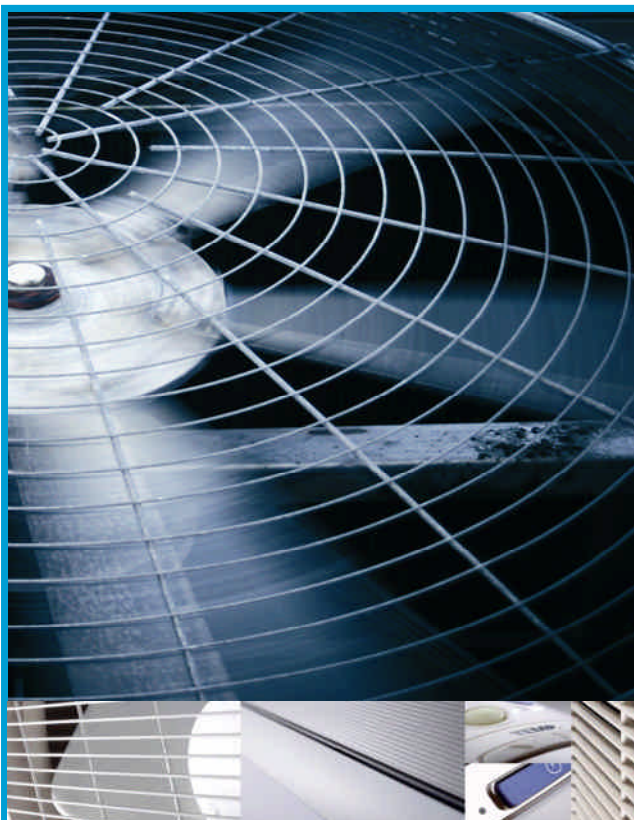

SANYO's flagship heating product is the ECO CO2 based heat pump, an advanced air to water system that delivers low cost hot water for heating and domestic use in residential and small commercial premises.

It produces around 50% less carbon emissions than gas-fired boilers and uses CO2 as its refrigerant; a natural and non toxic gas sealed within the system.

#### Features

- Highly sophisticated hot water management system which simultaneously produces different temperatures for hot water, radiators and under floor heating at the same time as working with other hot water sources such as solar heating.
- 4.5kW or 9.0kW capacity
- COPs of up to 3.745
- Abundant hot water up to 65°C

SANYO SANYO SANYO SANYO

Oceanair is *The Specialist Distributor* for air conditioning products and whether you are a consulting engineer or installation company we are available to assist you at all times. Oceanair Distribution has been in business since 1999, situated in Horsham, to offer the Fujitsu brand, but since then added the Sanyo range in 2001 and more recently the LG brand in 2006. Since then the company has grown whilst still maintaining the service levels our customers have come to expect from us.
